Architecture Faculty Meeting
Tuesday, March 25, 2025

AGENDA

SAET Program Directors

1. Your Time
2. Service Excellence/ Teaching
3. Service Excellence/ Advisement
4. ROI/ BOG Performance Metrics
5. ROI/ Strategic Plan/ Report
   - What were your 2024-25 priorities?
   - How many degrees will your program award in 2024-25 and 2025-26?
   - How many full-time students are enrolled in your program award in 2024-25 and 2025-26?
			Fall 2020	Fall 2021	Fall 2022	Fall 2023	Fall 2024 P
			9,179	8,994	9,228	9,269	9,313
Grand Total			9,179	8,994	9,228	9,269	9,313

DeSantis moves to create Florida's own DOGE to target college spending

The governor also suggested the department would eliminate what he called "ideological" curriculum and programming.

Published Feb. 25, 2025

Ben Unglesbee
Senior Reporter

Florida Gov. Ron DeSantis, above, created a state-level Department of Governmental Efficiency that he said would do a "deep dive" into college finances and operations. *Stephen Maturen / Stringer via Getty Images*

🔊 Listen to the article 4 min

Dive Brief:

- Florida Gov. Ron DeSantis wants a state-level version of the Elon Musk-led Department of Government Efficiency that would, among other things, scrutinize spending, staff and curriculum at Florida colleges and universities.

- DeSantis created Florida State Department of Governmental Efficiency, or Florida DOGE, via underline executive order Tuesday, saying in a press conference he wants the state to be as "lean and as efficient as possible."

- The order directs Florida DOGE to work with state education officials to "eliminate unnecessary spending, programs, courses, staff, and any other inefficiencies within the State University System and the Florida College System." The systems oversee 12 universities and 28 colleges, respectively.

Subject: FW: Meeting Summary for Council of Academic Deans Meeting
Date: March 21, 2025 at 9:19:55 AM EDT

FYI.

Meeting summary for Council of Academic Deans Meeting (03/20/2025)

Quick recap

The meeting focused on various topics including the performance-based funding metrics, the importance of tracking graduate employment and wages, and the need for innovative programs. There were discussions on improving the use of Canvas, the learning management system, among faculty and students, and the importance of student success as the top priority for the university. The meeting also covered updates on the financial aid assessment, the upcoming spring preview event, and the transfer portal and its impact on the admissions process.

Next steps

• Deans to review and implement consistent use of Canvas for all courses in their colleges/schools.
• Deans to address and prevent unauthorized class cancellations by faculty.
• Deans to align their activities and priorities with the 5 strategic buckets outlined by Provost Watson.
• Deans to review and optimize use of staff and leadership teams to focus on high-impact priorities.
• Dr. Jones and SPAE team to provide data dashboards to colleges/schools for tracking key metrics.
• Deans to implement regular progress review meetings with their teams on strategic priorities.
• Deans to ensure accountability for strategic priorities through performance evaluations and regular check-ins.
• Academic Affairs to provide training and timely information to support Deans' efficiency and impact.
• Deans to identify redundant or low-impact activities that can be streamlined or eliminated.
• Deans to focus on student success metrics including retention, persistence, and graduation rates.
• Deans to evaluate curriculum relevance and address bottlenecks in their programs.
• Deans to collaborate and share best practices without the Provost present.

• Deans to take ownership of student and faculty recruitment for their colleges/schools.
• Academic Affairs to develop professional development opportunities for department chairs and associate/assistant deans.
• Ms. Ivory in the Teaching and Learning Center to provide Canvas training for faculty.

Summary

Team Updates and Performance Metrics
In the meeting, Allyson welcomed new team members and encouraged them to stay within time constraints. Pierre shared a positive update about two students visiting the campus and their admission to a medical school. Allyson apologized for a format issue with the Council and asked for flexibility. She also acknowledged birthdays and special milestones, including Dr. Hyman's achievement of doubling the number of students studying abroad in a year. Allyson set a goal for a quarter of the student body to travel abroad by 2030. She then handed over to Dr. March Dallas to give her report from the United Faculty of Florida. Allyson also acknowledged the team's performance in the performance-based funding metrics, scoring 82 points. She encouraged the team to continue striving for excellence and highlighted areas where they could gain more points.

Tracking Graduate Employment and Wages
Allyson discusses the importance of tracking graduate employment and wages, explaining that Florida has a comprehensive system for monitoring career pathways. She emphasizes the need for public-private partnerships to ensure graduates find well-paying jobs, citing architecture graduates as an example of success. The conversation then shifts to the importance of consistently improving performance metrics, particularly graduation rates, to maintain excellence points. Allyson and other faculty members discuss strategies for offering second 8-week courses and addressing financial aid challenges to help students graduate on time. They explore potential solutions, including having students complete initial assignments to trigger financial aid for mid-semester courses.

Canvas Usage and Financial Aid Updates
The meeting began with Allyson discussing the correlation between their canvas usage and class cancellation and its impact on their performance-based funding. Juan then provided updates on the financial aid assessment and the upcoming spring preview event. He also mentioned the changes being made to the Recruitment Council. Allyson emphasized the importance of data and the need for innovative programs. Dr. Harris and Mathis discussed the Faculty Senate's efforts to secure additional resources and their work on curriculum review and approvals. Dr. Jones provided an update on the strategic planning and institutional effectiveness, highlighting the progress made and the need for continued improvement. Finally, Kelly Bickham from athletics and compliance discussed the transfer portal and its impact on the admissions process, as well as the real-time NCA benchmarks.

NCAA Transfer Portal Challenges
Kelly presents an overview of NCAA transfer portal windows and the challenges they pose for recruiting student-athletes. She explains that when the portal opens, thousands of names appear, and coaches must quickly identify potential recruits. As a mid-major institution, FAMU often has to wait longer in the process

compared to larger schools. Kelly highlights the issues with late enrollments, particularly in the spring semester, and suggests having designated advisors available for athletes during peak periods. She also discusses NCAA benchmarks for academic eligibility and the use of interdisciplinary studies and philosophy majors for transfer students to meet these requirements. The importance of timely minor requests and transfer credit evaluations is emphasized to ensure proper course counting for eligibility purposes.

Improving Canvas Usage for Faculty

The meeting focused on improving the use of Canvas, the learning management system, among faculty and students. It was noted that only 40% of faculty are using Canvas, and less than 50% have activated their Canvas shell. The Dean emphasized the importance of using Canvas for tracking student progress and grades, especially for high-achieving students who expect regular feedback. The Dean also discussed the need for a formal policy on using Canvas, and the possibility of adding it as a requirement for all faculty.The conversation ended with an exercise to identify the top 5 time commitments for each Dean, and a discussion on aligning efforts with the institution's strategic plan.

Interactive Poll Challenges Faculty Participation

Dr. Collins introduces an interactive poll for the meeting participants, but many faculty members experience technical difficulties accessing it. Dr. King provides alternative instructions to help everyone join, and some participants successfully enter using their Gmail accounts. The group discusses generational differences in technology use and plans for faculty training on digital tools. Despite ongoing issues for a few participants, most eventually access the poll, which asks about their research interests. The Provost emphasizes the importance of full participation and not leaving anyone behind.

Identifying Time-Consuming Areas for Improvement

The meeting discusses a survey of students' plans to return to FAMU, with 96% indicating they would return. Allyson then leads an exercise where participants identify their top 5 time-consuming areas and which require immediate attention. The group discusses how these areas align with strategic "buckets" such as service excellence, performance metrics, and Carnegie R1 status. Allyson emphasizes the importance of delegating tasks to focus on high-impact priorities. The discussion concludes with participants sharing how they measure progress, track metrics, and ensure accountability in these priority areas.

Prioritizing Student Success and Performance Metrics

Dr. Palm emphasizes the importance of student success as the top priority for the university. He encourages deans to focus on curriculum evaluation, retention, recruitment, and graduation rates. Dr. Palm suggests that deans should have a better understanding of their departments' performance metrics and share best practices among themselves. He also stresses the need for professional development of chairs and assistant deans to help run colleges and schools effectively. The provost, Dr. Watson, acknowledges the critical time for the university and the need to stay relevant in a competitive environment.

Outreach and Recruitment Summary

Fall 2023- Spring 2024

By Stacy Tinner, Jr,
SAET Outreach Coordinator

Contents

Listed and charted below represent the applied, admitted and enrollment data over the past five years. Enrollment data for Fall 2024-Spring 2025 is not available at this moment.

SAET
Applied-Admitted-Enrolled
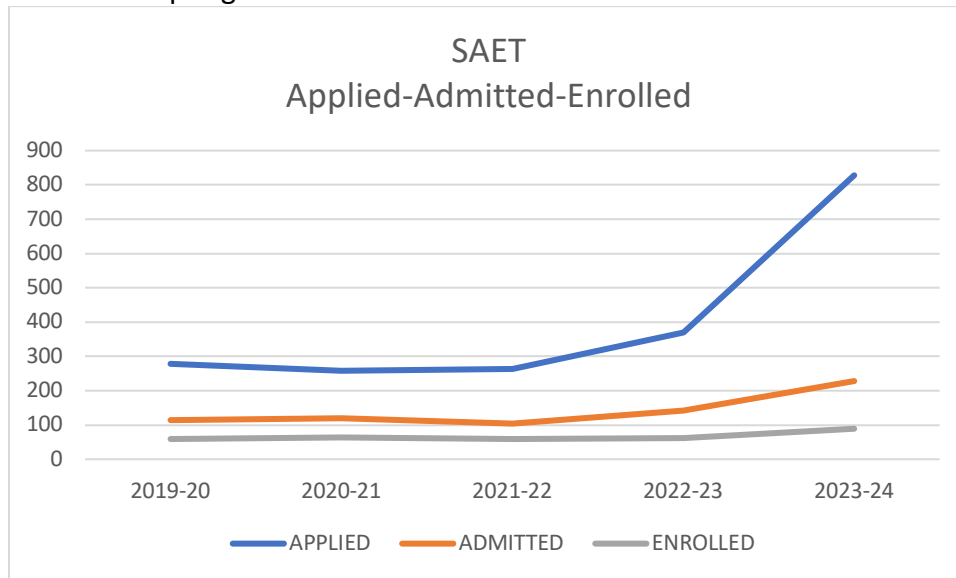

Sch of Arch & Eng Technology	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25
APPLIED	279	258	264	369	828	TBD
ADMITTED	114	120	104	142	228	TBD
ENROLLED	59	64	59	61	89	TBD

As indicated in the chart, applications for admissions has increased due of Florida A&M University has implemented the use of the common application process. The availability of more applications increased the opportunity for admitted students the possibly of enrollment.

SAET Admits Chart
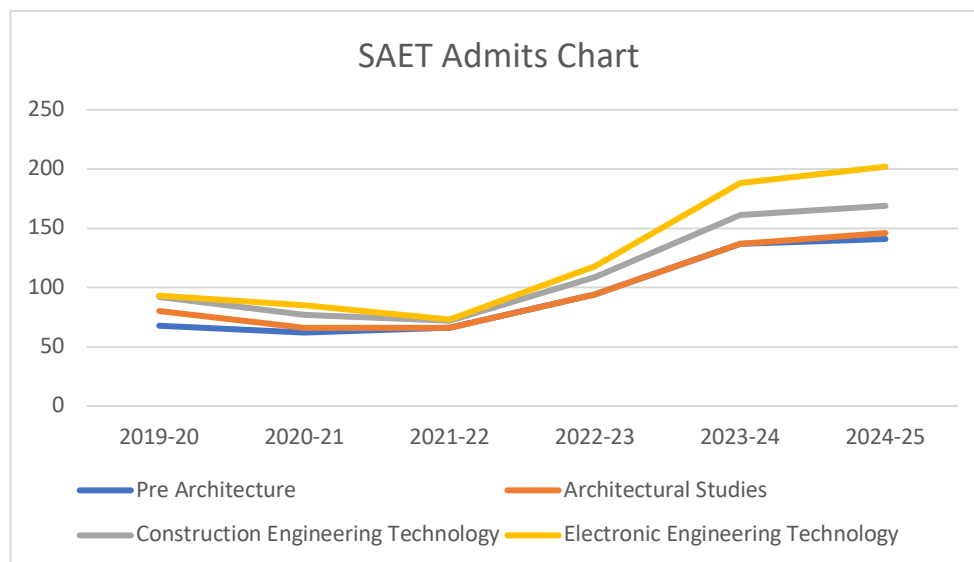

The School of Architecture and Engineering Technology (SAET) as a whole, has increased the number of admitted students and in turn increased the possibility of enrollment. For the most part, this statement can be applied across undergraduate programs, as shown below.
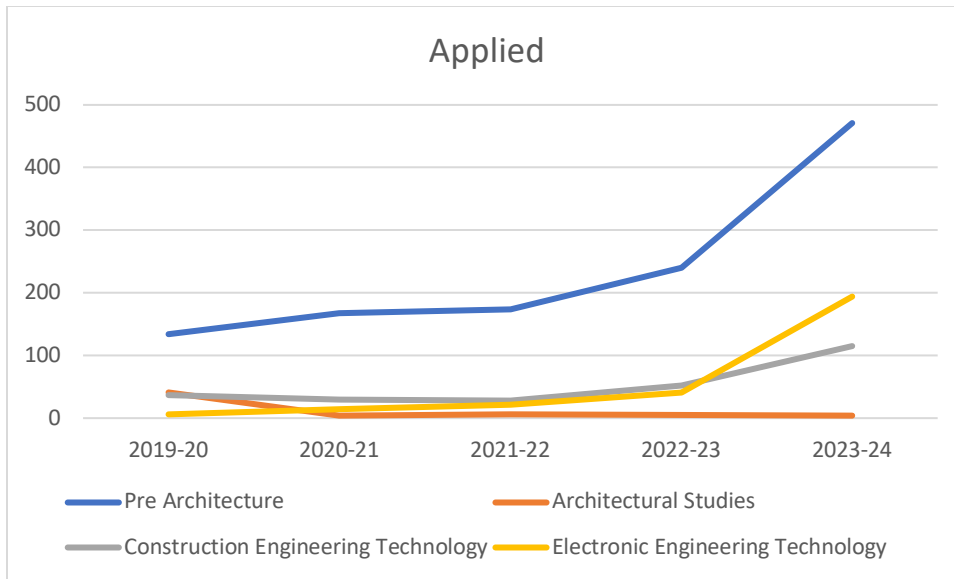

Applied

Ratings Definition

The following ratings were given based on student participation, university support, knowledge of the program and interest.

4- These events support the university and are well attended with great potential for applicants. Recommended continuous recruitment for these events.

3- Theses events provide great exposure and opportunities for applicants. Recommended for future recruitment.

2- These events are well attended, but knowledge of programs was not high. Recommended area for future recruitment by selected target locations (High, Middle, and technical Schools).

1- These events had great hospitality, very informative, and a sincere interest in FAMU and SAET programs.

Rating Recommendation(s)

1. Assign a HIGH Priority (4) to all Leon County Events.
2. Assign a MID_HIGH Priority (3) to areas within 1.5 hours of Tallahassee. For example, visit the cluster Suwannee, Hamilton, Columbia, and Madison Counties.
3. Assign 3 to the JUCO's where existing articulation agreements exist.
